PROFESSIONAL SUMMARY

Motivated and self-driven Cloud Computing and Software Development learner with demonstrated hands-on experience in Python, SQL, AWS cloud services, and data analysis. Currently enrolled in the AWS re/Start programme (Praesignis) and on track to obtain the AWS Certified Cloud Practitioner certification in August 2026. Holds an AWS Cloud Quest: Cloud Practitioner badge and has completed multiple industry-recognised short courses in software engineering, cybersecurity, AI, and data analysis. Built several real-world Python and machine learning projects demonstrating applied technical skills. Strong foundation in cloud architecture, security, IAM, EC2, S3, VPC, and AWS pricing models. Eager to contribute to cloud infrastructure, DevOps, or data engineering teams.

TECHNICAL SKILLS

Cloud & Infrastructure	AWS (EC2, S3, IAM, VPC, RDS, Lambda), AWS Cloud Practitioner (exam August 2026), Cloud Architecture, Security & Compliance
Programming Languages	Python, SQL, JavaScript, HTML, CSS
Data & Analytics	Pandas, NumPy, Matplotlib (learning), Jupyter Notebooks, Data Analysis, Machine Learning (scikit-learn)
Databases	SQL — relational databases, queries, joins, data modelling
Tools & Platforms	Git, GitHub, VS Code, Spring Boot, REST APIs, Jupyter
Concepts	Object-Oriented Programming (OOP), Automation, Debugging, Agile basics, Cybersecurity fundamentals, Generative AI
Languages	English (fluent), Afrikaans (proficient)

PROJECTS

Nasdaq Machine Learning Project

March 2026 – April 2026

[github.com/Masobela/nasdaq-ml-project](#)

- Built a machine learning model to analyse and predict Nasdaq stock trends using Python, Pandas, and scikit-learn.
- Applied data cleaning, feature engineering, and model evaluation techniques to real financial datasets.

Transaction Pattern Analyzer

March 2026

[github.com/Masobela/Transaction_Pattern_Analyzer](#)

- Developed a Python-based tool to detect and visualise patterns in financial transaction data.
- Utilised Pandas and Matplotlib to generate actionable insights from raw transaction records.

Mini Banking System

March 2026

[github.com/Masobela/Mini-banking-project](#)

- Designed and implemented a console-based banking application using Python OOP principles.
- Features include account creation, deposits, withdrawals, and transaction history tracking.

Fraud Detector

March 2026

github.com/Masobela/Fraud-detector

- Built a fraud detection classifier using Python and machine learning to flag suspicious transactions.
- Applied binary classification techniques and evaluated model performance with precision/recall metrics.

AWS re/Start Lab Portfolio

April 2026 – Present

github.com/Masobela/AWS-re-Start

- Ongoing repository of AWS hands-on labs covering EC2, S3, IAM, VPC, RDS, and cloud security.
- Documents practical cloud infrastructure skills developed during the AWS re/Start programme.

EDUCATION & CERTIFICATIONS

AWS re/Start Cloud Computing Programme

April 2026 – Present

[Praesignis \(AWS Authorised Training Partner\)](#)

Vanderbijlpark, SA

- Comprehensive cloud computing programme covering AWS core services, security, architecture, billing, and DevOps fundamentals.
- Exam: AWS Certified Cloud Practitioner (CLF-C02) — scheduled August 2026.

AI Practitioner Learning Plan

14–15 April 2026

[Praesignis](#)

- Completed structured AI practitioner curriculum covering machine learning concepts and cloud AI services.

Generative AI for Decision Makers

15–16 April 2026

[Praesignis](#)

- Studied generative AI tools, prompt engineering, and business applications of large language models.

Introduction to Data Analysis

7–13 April 2026

[Netcampus](#)

- Covered data analysis workflows, tools, and interpretation techniques for business intelligence.

Introduction to Artificial Intelligence

23–30 March 2026

[Netcampus](#)

- Foundations of AI including supervised/unsupervised learning, neural networks, and AI ethics.

Introduction to Cybersecurity

16–20 March 2026

[Netcampus](#)

- Core cybersecurity principles: threat landscapes, network security, encryption, and risk management.

Python for Data Analysis

March 2026 – Present

[FreeCodeCamp](#)

- Self-paced programme covering Python libraries (Pandas, NumPy, Matplotlib) for data analysis and visualisation.

Software Engineering Job Simulation

29 Jan – 8 Feb 2026

[Hewlett Packard Enterprise \(HPE\)](#)

- Simulated real-world software engineering tasks including code review, REST API development, and agile workflows.

Software Engineering

10–15 Feb 2026

[Wells Fargo](#)

- Completed software engineering virtual experience covering system design, debugging, and deployment.

SQL for Data Analysis

19 Feb 2026

[LinkedIn Learning](#)

- Structured Query Language for data retrieval, joins, aggregations, and database management.

National Senior Certificate (Matric)

Jan 2023 – Dec 2023

Hoërskool Suiderlig

Vanderbijlpark, Gauteng

- Subjects: English HL (56%), Afrikaans FAL (41%), Mathematical Literacy (56%), Life Orientation (71%), Business Studies (43%), Computer Applications Technology (54%), Life Sciences (41%).
- Admitted to Diploma or Higher Certificate study.

Coding Fundamentals

Feb 2021 – Sep 2021

Google Grasshopper

- Completed introductory coding programme covering JavaScript fundamentals, logic, and problem solving.
