Neo Masobela

AWS Certified Cloud Practitioner | Aspiring Junior Cybersecurity / SOC Analyst | Cloud Support

neomasobela30@gmail.com | 068 135 0347 | Vanderbijlpark, Gauteng, South Africa | linkedin.com/in/neo-masobela-26678a258 | github.com/Masobela | masobela.github.io

PROFESSIONAL SUMMARY

Aspiring cybersecurity and cloud professional combining AWS Certified Cloud Practitioner training with hands-on cybersecurity lab experience gained through the Oasis Infobyte Cyber Security Internship (OIBSIP). Completed the AWS re/Start cloud computing programme through Praesignis, an AWS Authorised Training Partner, building practical experience across AWS core services, identity and access management, and cloud security. Currently applying foundational skills in network reconnaissance, firewall configuration, and web application vulnerability testing within controlled virtual lab environments, and comfortable documenting technical findings and working methodically through practical problems. Studying cybersecurity fundamentals through Cisco Networking Academy and Hack The Box Academy, with a genuine interest in network security, vulnerability assessment, and cloud security. Seeking to grow into a Junior Security Analyst, SOC Analyst Trainee, IT Support, or Cloud Support role where continuous learning and hands-on problem-solving are valued.

TECHNICAL SKILLS

Cybersecurity
Nmap network scanning & reconnaissance | Port, service & OS detection | Firewall configuration (UFW) | SQL injection fundamentals (DVWA) | Vulnerability assessment fundamentals | Security incident documentation

Operating Systems & Networking
Kali Linux | Linux command line | TCP/IP, ports & protocols | Virtual lab networking (VirtualBox) | DNS | SSH | RDP | VPN & NAT fundamentals

Cloud (AWS)
IAM | S3 | Lambda | SNS | VPC & Security Groups | KMS | RDS | Inspector | Systems Manager (Patch Manager)

Tools & Programming
UFW | DVWA | Metasploitable 2 | Git & GitHub | Splunk fundamentals | Python (Pandas, scikit-learn) | SQL | Microsoft Office (Word, Excel, PowerPoint, Access)

CYBERSECURITY PROJECTS & HANDS-ON LAB EXPERIENCE

Oasis Infobyte Cyber Security Internship (OIBSIP) *In Progress, Started October 2026*

Task 1 — Network Scanning with Nmap

- Conducted network reconnaissance in a controlled virtual lab using Kali Linux and Metasploitable 2.
- Used Nmap for port scanning, service/version detection, and operating system detection.
- Identified open ports and services and documented findings in a scan report, interpreting results to understand potential attack surfaces.

Task 2 — Firewall Configuration with UFW

- Configured and enabled the Uncomplicated Firewall (UFW) on Kali Linux, applying default deny-incoming / allow-outgoing policies.
- Created rules to allow SSH (TCP 22) and HTTPS (TCP 443) while denying HTTP (TCP 80) and FTP (TCP 21).
- Verified firewall status and rules, performed connectivity checks from a separate virtual machine, and documented the configuration and testing process.

Task 3 — SQL Injection Testing with DVWA

- Installed and configured Damn Vulnerable Web Application (DVWA) in a local lab environment at Low security for controlled testing.
- Demonstrated a SQL injection vulnerability using crafted input and documented the difference between normal and injected input behaviour.
- Studied secure coding practices, including prepared statements and parameterized queries, to prevent SQL injection.

Repository: github.com/Masobela/OIBSIP

AWS & CLOUD PROJECTS

AWS re/Start — Cloud, Networking & Security Labs *April – August 2026*

- Built a serverless word-count pipeline (Amazon S3 → AWS Lambda → Amazon SNS) using Python and core AWS services.
- Configured IAM group-based access policies, VPC and subnet architecture, and troubleshot Security Groups.
- Applied AWS KMS encryption, and performed a MySQL-to-RDS database migration with data-integrity validation.
- Used AWS Inspector for vulnerability scanning and Systems Manager Patch Manager for patch compliance.

EDUCATION & TRAINING

National Senior Certificate (Matric) *Jan 2023 – Dec 2023*
Hoerskool Suiderlig, Vanderbijlpark, Gauteng.

AWS re/Start Cloud Computing Programme — Praesignis *Apr – Aug 2026*

Cisco Networking Academy — Cybersecurity & Networking *In Progress*

Hack The Box Academy — Networking Fundamentals *In Progress*

Introduction to Cybersecurity — Netcampus *16–20 Mar 2026*

Introduction to Splunk *2026*

CERTIFICATIONS

AWS Certified Cloud Practitioner (CLF-C02), Sept 2026 | AWS Cloud Quest: Cloud Practitioner Badge | Cisco Networking Academy — Intro to Cybersecurity Badge | Microsoft Intermediate Certificate (Word, PowerPoint, Excel, Access) | Google Workspace/Gmail Certificate

EMPLOYMENT & OTHER RELEVANT EXPERIENCE

Control Room Operator — Manufacturing Learnership, ArcelorMittal *~1 Year*

- Continuously monitored operational systems and screens to identify problems, stoppages, and abnormal activity in real time.
- Recorded and documented incidents, including cause, location, and time, maintaining clear and accurate operational records.
- Escalated issues based on severity, performed shift handovers, and maintained KPI boards while working 12-hour rotational shifts.

LANGUAGES

English (fluent), Afrikaans (proficient)
